

# coaxial valve

## type FCF-K 125

### 5-FCF-K 125

valve type with pilot valve

**2/2 way valve** externally controlled  
**pressure range** PN 0-40 bar  
**orifice** DN 125 mm  
**connection** flange  
**function** valve normally closed  
**symbol** NC

**△** Above stated body materials refer to the valve port connections that get in contact with the media only!

**design** pressure balanced, with spring return  
**body materials** ① aluminium ②  
 ③ ⑤  
 ④ ⑥

**valve seat** synthetic resin on metal  
**seal materials** NBR, PU PTFE, FPM, PE

**details needed for main valve**

- orifice
- port
- function NC
- operating pressure
- flow rate
- media
- media temperature
- ambient temperature
- type of actuation

**details needed for pneumatic actuation**

- nominal voltage
- type of protection
- actuation pressure range min/max
- pilot valve type

**details needed for hydraulic actuation**

- actuation pressure range min/max
- hydraulic control valve function

**⚠** The valves' technical design is based on media and application requirements. This can lead to deviations from the general specifications shown on the data sheet with regards to the design, sealing materials and characteristics.

**⚠** If order or application specifications are incomplete or imprecise there exists a risk of an incorrect technical design of the valve for the required application. As a consequence, the physical and / or chemical properties of the materials or seals used, may not be suitable for the intended application.

■ specifications not highlighted are standard  
 ■ specifications highlighted in grey are optional

general specifications		options
<b>ports</b>	FCF-K flanges PN 16/40	
<b>function</b>	NC	
<b>pressure range</b>	bar 0-16/0-40	
<b>Kv value</b>	m <sup>3</sup> /h 221	
<b>vacuum</b>	leak rate < 10 <sup>-4</sup> mbar·l·s <sup>-1</sup>	
<b>pressure-vacuum</b>	P <sub>1</sub> ⇔ P <sub>2</sub> pressure side max. 40 bar vacuum side leak rate upon request	
<b>back pressure</b>	P <sub>2</sub> > P <sub>1</sub> available (max. 16 bar)	
<b>media</b>	emulsions - oils - neutral gases	other medias upon request
<b>abrasive media</b>		
<b>damping</b>	opening by throttles on pilot valve	
<b>flow direction</b>	A ⇔ B as marked	bi-directional upon request (max. 16 bar)
<b>switching cycles</b>	1/min 30	
<b>switching time</b>	ms opening 700-3000 closing 450-3000	
<b>media temperature</b>	°C direct mounted pilot valve 60	>60°C upon request
<b>ambient temperature</b>	°C direct mounted pilot valve 50	>50°C upon request
<b>flush ports</b>		
<b>leak ports</b>		
<b>limit switches</b>		
<b>manual override</b>	via pilot valve	
<b>approvals</b>		upon request
<b>mounting</b>		
<b>weight</b>	kg FCF-K 42,0	
<b>additional equipment</b>	sensor / manometer connection G 1/4	

electrical specifications		options
<b>nominal voltage</b>	U <sub>n</sub> DC 24V	special voltage upon request
	U <sub>n</sub> AC 230V 50 Hz	special voltage upon request
<b>power consumption</b>	DC 4,8 W	
	AC pick up 11,0 VA holding 8,5 VA	
<b>protection</b>	IP 65 (P54) acc. DIN 40 050	
<b>energized duty rating</b>	ED 100%	
<b>connection</b>	plug acc. DIN EN 175301-803 form B, 4 positions x 90° / wire diameter 6-8 mm	
<b>additional equipment</b>	illuminated plug with varistor	
<b>optional</b>	M12x1 connector acc. DESINA	connector acc. VDMA
<b>max. temperature</b>	media 60°C	
	ambient 50°C	
<b>explosion proof</b>	EEx m II T5 nominal voltage U <sub>n</sub>	direct current 24 V 3,25 W
	power consumption	alternating current 230 V 50 Hz 2,90 W

pneumatic specifications		options
<b>actuation pressure range</b>	bar 4-10	3-10 upon request
<b>air consumption</b>	cm <sup>3</sup> /stroke 480	
<b>cycle speed</b>	main valve speed variable by throttles on pilot valve	
<b>control</b>	preferably 5/2-way pilot valve	
<b>pilot valve interface</b>	NAMUR VDI / VDE 3845	ISO 1 DIN 5599/1
<b>actuator ports</b>	2/4 G 1/4	G 3/8

hydraulic specifications		options
<b>actuation pressure range</b>	bar 30-60	
<b>by media</b>		
<b>control</b>	preferably 4/2-way control valve	
<b>actuator ports</b>	X/Y G 1/4	NPT 1/4
