

coaxial valve

type FK 25 TÜV

2/2 way valve direct acting
pressure range PN 0-40 bar
orifice DN 25 mm
connection flange
function valve normally closed
symbol NC

 Above stated body materials refer to the valve port connections that get in contact with the media only!

design pressure balanced, with spring return
body materials  TÜV

valve seat synthetic resin on metal
seal materials FPM, PTFE

 The valves' technical design is based on media and application requirements. This can lead to deviations from the general specifications shown on the data sheet with regards to the design, sealing materials and characteristics.

 If order or application specifications are incomplete or imprecise there exists a risk of an incorrect technical design of the valve for the required application. As a consequence, the physical and / or chemical properties of the materials or seals used, may not be suitable for the intended application.
