

pressure reduction valve

type **SPP-3 15 PC**

control valve proportional
pressure range PN 0-100 bar
orifice DN 15 mm
connection thread/cartridge
function stepless pressure regulation inline-version

Above stated body materials refer to the valve port connections that get in contact with the media only!

design externally controlled with spring return
body materials ① aluminium ④
 ① brass ⑤
 ③ ⑥ stainless steel
valve seat synthetic resin on metal / metal on metal
seal materials EPDM, PU, HNBR FPM

details needed for main valve

- orifice
- port
- pressure regulating range
- flow rate
- media
- media temperature
- ambient temperature

details needed for proportional valve

- nominal voltage
- actuation pressure range min/max

	ports	function	options
SPP-3	with valve body G 1/2 - G 3/4	stepless regulation	without valve body
pressure regulation range	bar	SPP-3 5-100	
Kv value	m ³ /h	max. 6,0	
media		gaseous - liquid - highly viscous - contaminated	version available
abrasive media	A ⇌ B	as marked	
flow direction	ms	< 200	
operating time	°C	0 to +60	
media temperature	°C	0 to +50	
ambient temperature			mounting holes
approvals			SPP-3 3,7
mounting			
weight	kg	SPP-3 4,8	
additional equipment			

electrical specifications

	options
nominal voltage	U _B DC 24 V (max. residual ripple 10%)
power consumption	DC < 0,7 A
control signals	U _E 0-10 V (R _e 10KΩ)
protection	IP65 acc. DIN 40 050
energized duty rating	ED 100% (observe the connection conditions accordingly)
connection	plug with 7 contacts / wire diameter 6-8 mm

pneumatic specifications

	options
actuation pressure range	bar see actuation pressure-diagram
air consumption	DIN ISO 8573-1 grade of compressed air quality 5/4/3
control	by 3/2-way proportional valve
actuator ports	1 G 1/8

The valves' technical design is based on media and application requirements. This can lead to deviations from the general specifications shown on the data sheet with regards to the design, sealing materials and characteristics.

If order or application specifications are incomplete or imprecise there exists a risk of an incorrect technical design of the valve for the required application. As a consequence, the physical and / or chemical properties of the materials or seals used, may not be suitable for the intended application.

connection plan

connection conditions

When supplying the electrical set point signal to the proportional valve, the actuating air must already be present. (see actuation pressure-diagram)

position of installation

arbitrarily, but regulator not downwards

■ specifications not highlighted are standard
 ■ specifications highlighted in grey are optional

type SPP-3 15 PC

drilling design for cartridge
